

# West metro school ratings

Here are report card ratings issued by the Oregon Department of Education. A school's overall grade is based chiefly on test scores from 2004 and 2005. The state also factors in attendance, improvement, whether the school tested at least 95 percent of its students and, for high schools, the dropout rate.

Schools face no consequences for their ratings.

The state rates four year achievement trends by comparing a school's test average for 2004 and 2005 with its test average for 2002 and 2003.

Each school also got a federal rating, based largely on how well it taught special education, limited English and minority students. In contrast, the state grade reflects average schoolwide performance.
